

Corporate & Lobby Art

Sold in sets of six, these framed prints serve as brand elements and artwork in the dealership service centers.

These high-quality, direct-imprinted wood plaques, measuring 5/8" thick, take the place of framed prints you might otherwise expect in an immediate care center waiting room environment.

Next time you visit a waiting room or office lobby, check out the art on the walls. Probably a mass-produced print in a non-descript frame. We can transcend the expected and provide corporate art that is properly themed, scaled, colored, and displayed because it is produced from original and collaborative concepts. We have competitively-priced, print-on-demand capabilities for unmatched flexibility.
