

Product Replicas & Miniatures

Product Replicas & Miniatures

This feed & seed corn company utilized actual corn kernels encased in acrylic as an award for their top distributors.

The unique bottle shape was molded directly from an actual beverage bottle, and replicated in a lustrous gold finish.

The pizza chain's cartoon mascot was brought to life in full dimension, replete with a polished gold metallic finish and presented to top franchise performers by the company's founder.

The retail giant's iconic shopping bag was miniaturized in color-specific glass and presented to top achieving sales associates.

All nouns—people, places and things—are suitable objects for creating replicas and miniatures. We can achieve a spot-on rendering of products, packages, founders, mascots, buildings, vehicles...the possibilities are endless.
